📍 Haldwani, Uttarakhand

## SUMMARY

Tech enthusiast with expertise in **HTML, CSS, JavaScript, Python, and Machine Learning**, passionate about building innovative AI-driven solutions. Skilled in **data analysis, SQL, Power BI, and visualization techniques** to transform complex datasets into actionable insights. Seeking opportunities in **Frontend Development and Data Analysis** to contribute creatively while continuously enhancing technical and analytical skills.

## EXPERIENCE

**Web Development Intern**                                    08/2024  09/2024

Octanet Service

A company specializing in web development and IT services
- Worked on live projects based on PHP.
- Interned as a Web Development trainee.

## EDUCATION

**B-Tech AI-ML**                                              08/2022  05/2025

JB Institute of Technology                                   Dehradun

**Diploma in Electronics Engineering**                       08/2019  05/2022

Government Polytechnic                                        Pantnagar

## TRAINING / COURSES

**Web Development**

Web Development using PHP | Internshala Training

**Power BI workshop**

Office Master

**SEO for Beginner**

Great Learning

## PROJECTS

**Image Classification Using Deep Learning**

Project aimed at image classification using deep learning techniques
- Classified images using CNN, Transfer Learning, and YOLO

**HR Analytics Dashboard**

Designed a Power BI dashboard to analyze attrition, tenure, and workforce trends for data- driven HR decisions.
- Enabled HR team to monitor workforce metrics in real-time and reduce attrition by identifying high-risk groups.

**Face Recognition for Attendance**

A project focusing on attendance tracking using face recognition technology
- Developed a face detection system for attendance using Python libraries
- Utilized OpenCV for implementation

## STRENGTHS

**Analytical Thinking**

Experienced in breaking down complex problems into smaller manageable parts, resulting in a comprehensive solution.

**Technical Proficiency**

Proficient in data management and predictive model development using SQL, Python, and R.

**Communication**

Excels in presenting complex data in understandable terms, facilitating collaboration across departments.

## KEY ACHIEVEMENTS

**Skate Competition Achiever**

Achieved 1st position in district level skate competition

## Tech Skills

Front End : HTML, CSS, Javascript
Programming Languages : Python, R, SQL, Java
Visualization Tools : Power BI
OpenCV

## Soft Skills

Strong communication
Teamwork skills
Time management
Critical thinking

## Language

Hindi
English
